Google Scholar: quick user guide

What is Google Scholar?

Stand on the shoulders of giants.

Google Scholar provides a simple way to broadly search for scholarly literature. From one place, you can search across many disciplines and sources: articles, theses, books, abstracts and court opinions, from academic publishers, professional societies, online repositories, universities and other web sites. Google Scholar helps you find relevant work across the world of scholarly research.

Features of Google Scholar

- Search scholarly literature from one convenient place
- Explore related works, citations, authors, and publications
- Locate the complete document through your library or on the web
- Keep up with recent developments in any area of research
- If you’re an author, check who’s citing your publications, create a public author profile

Accessing Google Scholar

Just search for ‘Scholar’ in Google and follow the links or go directly to: http://scholar.google.co.uk

Searching Google Scholar

Search in the main search box or use the menu option to use the Advanced search option:
Viewing and downloading results

When you have found some useful articles, look for the Full Text @ Strathclyde link.

Corporate social responsibility in the supply chain: an application in the food industry
Abstract The food industry faces many significant risks from public criticism of corporate social responsibility (CSR) issues in the supply chain. This paper draws upon previous research and emerging industry trends to develop a comprehensive framework of supply

- The star saves the record to your Google Account.
- The quotation mark allows you to send the record to EndNote Online (choose RefMan).
- ‘Cited by’ shows you all the other articles that cite this one.

Full Text at Strathclyde

When you use a campus-networked PC, Google Scholar will automatically link to the University Library’s print holdings and online subscriptions so you can check whether the books/articles are available to you. If you are using a laptop or PC off-campus then you can still see what’s available by choosing to display the Full Text @ Strathclyde

Exporting Results into EndNote

It is possible to export references into EndNote. Choose the quotation mark and then EndNote for EndNote Desktop or RefMan for EndNote Online.

You may prefer to export references more easily from other databases.

Warning!

Although Google Scholar is a useful tool, it does NOT search every database. Nor does it allow access all of the University of Strathclyde’s subscribed content.
To find specific databases within your subject area, please look at the range of Strathclyde LibGuides: http://guides.lib.strath.ac.uk/
